TO WHOM IT MAY CONCERN

INSPECTION AND VALUATION NOTICE

This is to certify that the undersign person inspected the 400 mm Cutter Suction Dredger of M/S. Ronji Construction named M.D. Ruposi. Registration No- D/9575 on 28th March 2017. This dredger was built by ITALDRAGHE SpA, Italy a worldwide recognised dredger manufacture with over 60 years' experience in the design and construction of dredgers.

We found the dredger to be of a world class standard with Caterpillar engine installed and fitted with up-to-date equipment. The dredger meets the necessary Bangladesh Government criteria and regulations for carrying out a full range of dredging operations in rivers and port.

We value the dredger in its current condition to be no less than GBP 1,150,000.00 (One million one hundred and fifty thousand Pounds Sterling).

We are confident this dredger can perfectly contribute in the vital Capital Dredging Programmes currently being undertaken in Bangladesh.

Yours sincerely

Robin Campbell
